Automation Control System LLC

Candla
Shine Brighter, See Beyond

About Our Company

At **Candla**, we create smarter, more connected, and efficient spaces through innovative automation and technology solutions.

Our expertise includes Home Automation, Smart Home Solutions, Lighting Automation, Wired & Wireless Automation, GRMS, and Automation Product Sourcing for residential, commercial, and hospitality projects.

We work closely with clients, consultants, contractors, and technology partners to deliver reliable, scalable, and tailored solutions—from product selection and system design to installation and integration.

Candla — transforming spaces into smarter experiences, greater efficiency, and future-ready environments.

Our Service

01 | HOME AUTOMATION

Candla transforms living spaces with intelligent automation for lighting, air conditioning, curtains, and more. Designed around your lifestyle, our solutions provide effortless comfort, convenience, and control. Experience a smarter, more connected home where technology works seamlessly in the background.

02 | LIGHT AUTOMATION

Create the right atmosphere for every moment with intelligent lighting solutions. **Candla** provides seamless control, enhanced energy efficiency, and flexible lighting experiences. From ambient moods to everyday functionality, our systems bring comfort, sophistication, and precision to every space.

Our Service

03 | BUILDING AUTOMATION

Candla transforms living spaces with intelligent automation for lighting, air conditioning, curtains, and more. Designed around your lifestyle, our solutions provide effortless comfort, convenience, and control. Experience a smarter, more connected home where technology works seamlessly in the background.

04 | ELV SYSTEM AUTOMATION

Connect and secure your spaces with integrated ELV automation solutions. **Candla** brings together CCTV, access control, communication networks, and other low-voltage systems to create reliable and connected environments. Our solutions are designed for seamless integration, performance, security, and long-term efficiency.

05 | PRODUCT SOURCING

Candla provides professional product sourcing for automation, ELV, lighting, security, and smart building projects. We source reliable products from trusted manufacturers based on your project requirements. Our approach ensures quality, compatibility, availability, and dependable performance from product selection to project delivery.

Our Vision

To make advanced automation accessible to everyone by providing
innovative, technology-oriented solutions at affordable prices, enabling
smarter and more comfortable living and working spaces.

At **Candla**, our mission is to deliver reliable and cost-effective Light, Home, Office, and Restaurant Automation along with ELV services. We strive to combine innovation, quality, and affordability so that individuals and businesses can experience the benefits of modern technology without compromise.

Our Mission

Our Value Proposition

Every project has its own vision, requirements, and challenges. At **Candla**, we develop thoughtfully tailored automation solutions that align with the project scope, architectural design, infrastructure, user experience, and budget. We work closely with clients, consultants, contractors, and project teams to ensure every solution is practical, seamless, and future-ready. From initial consultation and technical recommendations to product sourcing, system design, integration, commissioning, and after-sales support, we remain committed to delivering quality, reliability, and professional service at every stage.

Trusted & Loved

Our Technology Ecosystem

We proudly collaborate with leading global brands and trusted industry partners to deliver reliable, innovative, and high-quality automation solutions. Our strong partnerships give us access to proven technologies, advanced products, and industry expertise, allowing us to select the right solutions for every project and application. By working with established brands and experienced technology partners, we ensure quality, compatibility, performance, and long-term value for our clients. From product selection and technical consultation to system integration and project support, our partnerships strengthen our ability to deliver dependable solutions with confidence.
